- a second planar surface comprising at least one recess disposed within the second planar surface, the second planar surface being offset from the first planar surface,
- a third planar surface comprising at least one recess disposed within the third planar surface, the third planar surface being offset from the first planar surface
- a container adapted to fit at least partially within the tray, the container adapted to rest upon at least one of the plurality of planar surfaces, the container adapted to be reclosable and to retain accessory articles useful in performing a medical procedure; and
- a cover adapted to be placed over the tray;
- wherein each recess is adapted to hold at least one article useful in performing a medical procedure.
- 12. The PEG kit as in claim 11, wherein at least one said recess disposed in said first planar surface is adapted to hold a looped placement wire.
- 13. The PEG kit as in claim 11, wherein at least one said recess disposed in said second planar surface is adapted to hold at least a portion of a percutaneous endoscopic gastrostomy tube.

- 14. The PEG kit as in claim 13, wherein said percutaneous endoscopic gastrostomy tube comprises a bumper, said bumper disposed within at least one said recess in said second planar surface.
- 15. The PEG kit as in claim 11, wherein at least one said recess disposed in said third planar surface is adapted to hold an introducer cannula.
- **16**. The PEG kit as in claim 11, wherein said cover rests on a peripheral edge of said tray.
- 17. The PEG kit as in claim 11, wherein at least one said recess disposed in said first planar surface is adapted to retain at least a portion of a guide wire.
- **18**. The PEG kit as in claim 11, wherein at least one said recess disposed in said second planar surface is adapted to retain an exterior tube retention device.
- 19. The PEG kit as in claim 11, wherein said container rests on at least a portion of said first planar surface.
- **20**. The PEG kit as in claim 11, wherein at least one of said planar surfaces comprises at least one boss extending upwardly from the surface.
- 21. The PEG kit as in claim 20, wherein said boss extends upwardly from said second planar surface.
